

**AIA B106-2010 Standard Form of Agreement Between Owner and Architect for Pro Bono Services – Suggested Revisions:**

Standard of Care:

Article 2.2: At the end of this provision, add “The Architect makes no other representations or warranties, whether expressed or implied, with respect to the services rendered hereunder.”

Substitutions:

Article 3.1.4: At the end of this provision, add “The Owner shall defend, indemnify and hold the Architect harmless from any claims or demands arising out of a directive or substitution made against the Architect’s advice.”

Sustainable Design:

Article 3: *If the Owner decides to incorporate sustainable design in the Project, add the following provisions to Article 12:*

Article 12.1: “The LEED Green Building Rating System or similar environmental guidelines (“LEED”) utilizes certain design, construction and usage criteria in order to promote environmentally friendly building. The Owner acknowledges and understands that LEED is subject to interpretation, and achieving levels of compliance involves factors beyond the control of the Architect, including, but not limited to, the Owner’s use, operation and maintenance of the completed project. In addressing LEED, the Architect shall perform its services in a manner consistent with that degree of skill and care ordinarily exercised by design professionals performing similar services in the same locality, and under the same or similar circumstances and conditions. The Architect will use reasonable care consistent with the foregoing standard in interpreting LEED and designing in accordance with LEED. However, the Architect does not warrant or represent that the Project will actually achieve LEED certification or realize any particular energy savings. The Architect shall not be responsible for any environmental or energy issues arising out of the Owner’s use and operation of the completed project.”

Article 12.1.1: “Neither the Owner nor the Architect shall be liable to the other or shall make any claim for any incidental, indirect or consequential damages arising out of, or connected in any way to the Project or this Agreement. This mutual waiver includes, but is not limited to, damages related to loss of use, loss of profits, loss of income, loss of reputation, unrealized savings or diminution of property value and shall apply to any cause of action including negligence, strict liability, breach of contract and breach of warranty.”

Copyrights and Licenses:

Article 7.1.2: In line 2, after “Instruments of Service” delete “without retaining” and replace with “(including without limitation any future additions or alterations to the Project) without retaining and maintaining the retention of”. In line 4, after “further agrees to” insert “defend”.

Owner's Indemnity Obligation:

Article 8.1.4: In line 1, after "shall" insert "defend (if the Architect decides, in its sole discretion, to tender its defense to the Owner),". In line 3, delete "but only to the extent they are not directly" and replace with "except if they are solely".

Dispute Resolution:

Article 8.3: We generally recommend avoiding the inclusion of any provisions relating to arbitration in agreements of this kind. There are numerous drawbacks to arbitration, such as the fact that the joinder of additional parties is generally not permitted, discovery proceedings are generally not allowed, rules of evidence are not followed and the application of legal principles is not required.

Note: if the Owner insists on arbitration as the "binding dispute resolution" mechanism, we recommend requiring limited discovery and adherence to the rules of evidence and limiting the scope of arbitration and providing that claims submitted to arbitration must not exceed \$100,000, inclusive of interest and attorney's fees.

Hazardous Materials:

Article 10.6: At the end of this provision, add "In the event that the Architect or any other party encounters asbestos or hazardous or toxic materials at the job site, or should it become known in any way that certain materials may be present at the job site or any adjacent areas that may affect the performance of the Architect's services, the Architect may, at its option and without liability for consequential or any other damages, suspend performance of service on the Project until the Owner retains appropriate specialist consultant's or contractor's to identify, abate and/or remove the asbestos or hazardous or toxic material, and warrant that the job site is in full compliance with applicable laws and regulations."
